- Rainfast and longer lasting for all conditions
- Controls all species of slugs and snails
- Effective on adults and juveniles

### **HOGGONE® meSN Feral Pig Bait**

- Effective, fast-acting, humane, targeted
- Low environmental impact, BUT DEADLY TO FERAL PIGS
- Easy to use, classified for use by landholders without permits
- An Australian innovation

SLUGGOFF® is now in stock so back orders will be delivered within 1 week.

Due to the wet conditions in many areas this Autumn, slugs are posing a major threat. The infestations are more widespread than most expect and the impacts are underestimated.

To assess the risk, use a moist tile or flower pot base on the ground then check for slug numbers underneath overnight. Also look at slug numbers on the bottoms of silage bags when moving or feeding out.

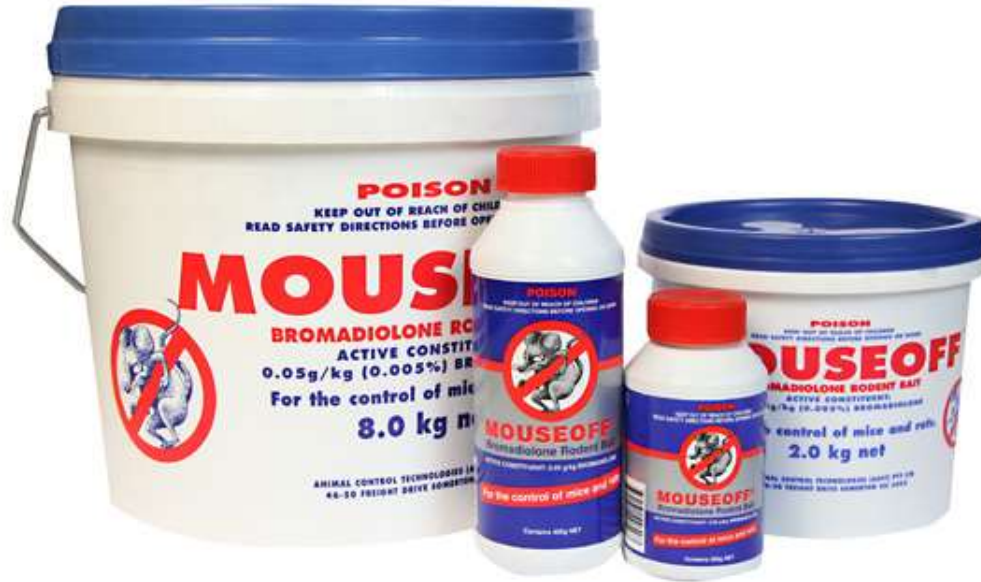

Only rain-fast slug bait provides an effective solution in wet seasons and SLUGGOFF® provides the lowest per hectare control cost of all products.

SLUGGOFF® Bait packaging includes a variety of sizes for all domestic and agricultural applications with 20kg bags with pourer spouts and carry handles, and 500kg bulka bags available.

**Other Products:**

MOUSEOFF® Bromadiolone grain bait for use around homes and sheds is available.

Our new product for humane feral pig control HOGGONE® meSN Feral Pig Bait is fully approved for use without permits by all landholders.
