DOM:

DIRECTIONS FOR USE:

DO NOT feed bait to non-target animals including birds.
DO NOT apply bait to, or in, crops which are in mid to late development stages.
DO NOT apply bait to, or in, crops if contamination of produce is likely to occur.
DO NOT contaminate dams, rivers, streams, waterways or drains with the product or used containers.

THIS PRODUCT MUST BE USED IN ACCORDANCE WITH THE LABEL INSTRUCTIONS AND ANY RELEVANT DOCUMENTATION ISSUED WITH THE STATE/TERRITORY AUTHORISATION TO USE 1080 PRODUCTS.

Refer to www.animalcontrol.com.au for an electronic version of your State/Territory documents.

RABBAIT® 1080 Carrot bait can be trailed in furrows to control rabbits. RABBAIT® 1080 Carrot bait is also suitable for aerial or broadcast applications. Aerial application of baits is subject to State/Territory Government authorisation and requirements.

Max 20kg/km trail or 10kg/ha for broadcasting or aerial

The use of 1080 rabbit baits for rabbit control is restricted in urban and some wildlife areas.

NOT TO BE USED FOR ANY PURPOSE, OR IN ANY MANNER, CONTRARY TO THIS LABEL UNLESS AUTHORISED BY APPROPRIATE LEGISLATION.

THIS PRODUCT IS NOT TO BE USED IN DOMESTIC OR HOME GARDEN SITUATIONS.

GENERAL INSTRUCTIONS:

Bait density & Placement of bait

A person laying RABBAIT® 1080 Carrot bait by trail baiting must take reasonable steps to ensure that the bait is placed in or adjacent to furrows that are not more than 10 centimetres deep and not more than 20 centimetres wide.

Before applying RABBAIT® 1080 Carrot bait it is required that at least two (preferably 3) un-poisoned free feeds are offered in the baiting area at intervals of at least 3 days. This allows rabbits to become accustomed to eating baits and helps the user to correctly estimate the required quantities of bait. Typical free feed application rates are 3-6 kg/km of trail.

The amount of RABBAIT® 1080 Carrot bait required per kilometre of trail will vary depending on local rabbit density, bait type and the amount of free feeding.

DISPOSAL OF UNUSED PREPARED BAIT

Bury discarded bait. Bury contaminated bags as described below in storage and disposal instructions.

MINIMUM DISTANCE, NOTIFICATION AND SIGNAGE REQUIREMENTS:

Neighbour Notification

Neighbours must be notified to allow them to take appropriate action. The notification must advise that steps (e.g. restraint, muzzling) need to be taken to ensure that domestic dogs do not gain access to 1080 bait or poisoned animals. The notification must specify the dates between which baiting will occur. This notification should be in writing and should be given to all adjoining landholders at least 72 hours in advance except where alternative communication arrangements have been made that meet State /Territory requirements and overall safety criteria. A record of the notifications must be kept. Baiting must commence within ten days of notification or else another three days notice of intent to lay baits is required.

Signage

Signage is compulsory for all lands where baiting occurs. Do not lay baits until signage is in place. Signage must include – date baits laid, contact numbers, toxin name, target animal(s) and a warning that domestic animals and pets can be affected. Users must ensure signs are put up immediately before 1080 poisoning operations commence on the property and are placed according to the requirements specified by the State/Territory. Signs must be maintained for at least 4 weeks after the authorised period of bait lay has expired or after all untaken baits have been collected.

Distance Restrictions

Bait must be placed at least 150m from dwellings or public buildings, and 20m from permanent or flowing water bodies; 5m from boundary fences; and 5m from the edge of formed public roadways; or as specified by State/Territory authority.

PROTECTION OF DOMESTIC AND FARM DOGS

Steps (e.g. restraint, muzzling) need to be taken to ensure that domestic and farm dogs do not gain access to 1080 bait or poisoned animals. In the event of accidental poisoning seek immediate veterinary assistance.

PROTECTION OF WILDLIFE, FISH, CRUSTACEA AND ENVIRONMENT

Do not contaminate dams, rivers, streams, waterways or drains with this chemical or used containers. Information on non-target animal distribution, conservation status, habitat preference, diet, tolerance to 1080, body weight and size of home range can be used to reduce poisoning risks posed by baiting programs. Time baiting programs when non-target species are least active or least susceptible.

To the extent possible, untaken bait should be recovered at the end of a baiting campaign. [Untaken bait should be removed or covered after 7 days (or as per relevant State/Territory baiting program requirements).] Animal carcasses should be recovered during and for 14 days after a baiting campaign. Untaken bait and animal carcasses should be destroyed by burning or burial according to the requirements of the State or Territory in which use has occurred.

Do not feed bait to non-target animals including birds. Any incidents where it is suspected that non-target animals may have been poisoned by 1080 should be notified to State authorities.

STORAGE, TRANSPORTATION AND DISPOSAL

Safe storage is the responsibility of all persons who are supplied with this poison. The product must be stored in the closed original labelled container in a dry, cool well-ventilated area out of direct sunlight. Store in a locked room away from children, animals, food, feedstuffs, seed and fertilisers at all times, except when required for use. The product is only to be kept or stored in a container bearing this approved label as supplied by the manufacturer. Unless approved by the relevant State/Territory authority, users must not store this product after a baiting campaign is complete. Transport only in original container and ensure packaging is secure before handling.

Bury empty containers in a local authority landfill. If no landfill is available, bury the containers below 0.5 m in a disposal pit specifically marked and set up for this purpose clear of waterways, desirable vegetation and tree roots. Empty containers should not be burnt. Do not re-use containers for any other purpose.

SAFETY DIRECTIONS

Very dangerous. Poisonous if swallowed. Harmful if absorbed by skin contact. When opening the container and using the product wear cotton overalls buttoned to the neck and wrists and a washable hat and elbow-length rubber gloves. If product on skin, immediately wash area with soap and water. If product in eyes, wash it out immediately with water. If clothing becomes contaminated with product, remove clothing immediately. After use and before eating, drinking or smoking, wash hands, arms and face thoroughly with soap and water. After each days use wash gloves and contaminated clothing.

FIRST AID

Speed in treatment is essential. If poisoning occurs, contact a doctor or Poisons Information Centre. Phone Australia 13 11 26. If skin contact occurs, remove contaminated clothing and wash skin thoroughly. Remove from the contaminated area. Apply artificial respiration if not breathing. If in eyes, hold eyes open, flood with water for at least 15 minutes and see a doctor.

MSDS

Refer to Material Safety Data Sheet available from supplier for further information.
